

WILCOX ELIMINATOR

WITH SEED PLANTING OPTION

ALL YOUR TILLAGE

"AND PLANTING"

IN ONE

OPERATION

By retaining the most critical and necessary tillage combined with the new seeding option, the perfect balance of efficient tillage and cost effective no-till is afforded.

ADVANCED AG TILLAGE SOLUTIONS SINCE 1973

With various processes and components working together growers are allowed to plant in a multitude of crops and conditions, which usually are only completed with no-till drills. But "now" with the cultural benefits of tillage.

Chassis' 10,000 lb. carrying capacity not only affords the "new seeding" attachment, but also allows for fertilizer and herbicide tanks.

Chisel shanks on 12 in. spacing capable of 16 in. depth, and can be fitted with fertilizer attachments. Rotors provide level mulched surface, perfect for seeding. Double action rotors allow effective incorporation of dry fertilizer, herbicide, and crop residue.

Double Roller assembly affords good coverage in all conditions including high trash and moisture.

Coil Roller provides seed floor to insure no seed placed too deep.
